SANITIZING SOAP

FDA Registered Microbial Cleanser
Removes Dirt and Grime While Killing Germs

KILLS UP TO 99.999% OF HARMFUL GERMS
NON-TOXIC, BLEACH + CHLORINE FREE
EFFECTIVE IN LESS THAN 30 SECONDS
MOISTURIZES WITH ALOE VERA

Washing hands with Germfree 24[®] FDA registered Sanitizing Soap will kill 99.999% of common bacteria why leaving the hands feeling soft and protected. Other FDA registered hand sanitizing soaps on the market today are primarily ethyl or isopropyl alcohol or chlorine based formulations and not suited for repeat use.

Germfree24[®] Sanitizing Soap is a fast acting, alcohol-free product that cleans, sanitizes and gently moisturizes your hands while offering extended protection against the harsh effects of repeated washing.

FDA & NSF Registered

Germfree24[®] Sanitizing Soap is both US FDA & NSF registered and ideally suited for commercial use in the food preparation, Healthcare and public service industries where frequent hand washing and hygiene standards are mandated by law.

Kills up to 99.999% of harmful germs

Germfree24[®] Sanitizing Soap kills up to 99.999% of the harmful common germs within 30 seconds and suitable for repeated use with out the fear of drying the hands.

Non-toxic Formula

Most sanitizing soaps available on the market today contain compounds that have been banned by the FDA as carcinogens and therefore do not meet the FDA monograph which becomes law in September 2017. Germfree 24[®] Sanitizing Soap is not only compliant with the new FDA regulations but is gentle enough for use by the whole family.

Moisturizes your hands with Aloe vera

Germfree24[®] Sanitizing Soap is a water-based sanitizing soap with added softening agents to leave your hands feeling fresh and soft and germ free. Our hand soap has been formulated to be non-irritating, ideal for repeated use in the home or commercial applications.
