Re: Letter of Recommendation

To Whom it May Concern

I am writing to firstly recommend the **Zetrisil base nano silicone equine sanitation technology used to great success at our Equine Horse racing facility, Turf Paradise, located at 1501 W. Bell Road Phoenix, AZ 85023.**

After witnessing first hand, the exemplary application service provided by ESC authorized Distributor ShieldUS, I can say without any reservation that the Zetrisil based technologies resolved our Equine Herpes outbreak. We plan to incorporate the Zetrisil nano silicone technologies and treatment protocols as a preventive solution to address any future, potential Equine Herpes virus outbreaks.

I am more than happy to recommend the Zetrisil based nano silicone technologies and the **treatment protocol offered by both ESC and ShieldUS to any interested parties.**

Sincerely,

General Manager  
Turf Paradise Race Course
